11 Scuba Diving Technical Diving

We will define tec diving as any dive where a direct and safe ascent is not possible. This includes dives below 130 feet (40 meters), multiple mix gas diving, ice or cave diving where an overhead environment exists beyond 130 linear feet (40 meters) of the surface, and wreck diving with penetration.

Technical Diving: The 10 Best Dive Sites in the World

Technical diving (also referred to as tec diving or tech diving) is scuba diving that exceeds the agency-specified limits of recreational diving for non-professional purposes. Technical diving may expose the diver to hazards beyond those normally associated with recreational diving, and to greater risk of serious injury or death.

Technical diving - Wikipedia

Technical scuba diving involves going beyond recreational scuba diving limits and includes one or more of the following: Diving beyond 40 metres/130 feet. Required stage decompression. Diving in an overhead environment beyond 40 linear metres/130 linear feet of the surface.

Technical Diving Course Offerings | PADI

Tech divers carry two masks, dive computers and/or depth-timing devices, SMBs and/or lift bags and any other lifesaving equipment. Dive planning. Another crucial difference between recreational and technical diving is the amount of planning involved in either. Technical divers learn to calculate how much gas they are likely to use on their dive.

What is Technical Diving? • Scuba Diver Life

Started in the form of cave diving, technical scuba diving takes divers beyond the typical recreational limits and allows them to do more. Typically, one or more of the following has to occur for a dive to be considered technical diving: Diving beyond 40 metres/130 feet deep.

What is technical diving? - PADI Blog - Scuba Diving and ...

Technical diving is, put simply, any diving that is set outside of recreational diving limits. It allows a diver the freedom to explore and dive beyond the traditional diving limits. A good example of this is cave diving, which is some of the most challenging and dangerous diving around today.

What Is Technical Diving? - DIVEIN.com

Technical diving is a form of scuba diving that exceeds the typical recreational limits imposed on depth and immersion time (bottom time). Tec diving involves accelerated decompression and/or the use of variable gas mixtures during a dive. Therefore, this advanced method of diving requires additional experience, training and equipment.

THE RIGHT REASONS "A lot of people get into technical diving because there is a particular dive they dream of doing," Smith says. "I was desperate to dive a wreck called the Salsette in the English Channel, but it lies at 150 feet, so I started twinset diving and learning deco diving and accelerated decompression because of that wreck." "For some the motivation is discovery, for ...

What Does It Take To Become A Technical Diver? | Scuba Diving

Buying recreational diving equipment is both daunting and exhilarating, and it's no different when it comes to technical diving equipment. We took a look at the topic a little while ago, and here we're going to delve a little deeper on how to go about choosing regulators for technical diving.
