## Fuller Air System Troubleshooting Guide

High-pressure air may exhaust suddenly. Wear safety glasses. Exhaust all air pressure from the system before removing air filter/regulator or combination cylinder cover. Note: During all testing, the vehicle air pressure must be greater than 90 PSI (620 kPa). If during testing the pressure falls below 90 PSI (620 kPa), make sure the transmission is in neutral, start the engine, and let the pressure build to governor cutoff.
