The Metadata Manager User Guide provides information about how to browse and search metadata in the This guide is written for business analysts who use Metadata Manager for metadata management and • • • • 9

Guide Metadata Manager User - Informatica
Metadata Manager contains models that define the classes, attributes, and relationships for different types of metadata sources. Metadata Manager packages models for many application, business glossary, business intelligence, data integration, data modeling, and relational metadata sources. You can create custom models for metadata source types for which Metadata Manager does not package a model.

10.4.0 - docs.informatica.com
To extract metadata from these sources, you first create an XConnect that represents the metadata source type. The XConnect includes the model for the metadata source. You then create one or more resources that are based on the model. The universal resources that you create behave like packaged resources in Metadata Manager.

Metadata Manager - Informatica
PowerCenter and Business Objects do not physically store the data that gets transformed. Instead, the data resides in a database. For example, PowerCenter source definitions and target definitions can represent database tables.
