This is the central research question which is pursued by in the publication "Innovation without Patents - Harnessing the Creative Spirit in a Diverse World." This question involves a balancing exercise between the need to incentivise research through offering legal protection and the need for a large public domain to encourage innovation which may be restricted by excessive protections.

### **Book Review - Innovation Without Patents: Harnessing The ...**

Innovation without Patents offers a thoughtful and empirically rich analysis of the current system in a number of developed and developing countries in the Asia-Pacific. It asks whether such innovations should remain free from patenting, or whether alternative intellectual property regimes should be offered in such cases, and indeed whether the requirements change depending on a country's level of development.
