About 10% of the population have an IQ below 80. Such people find it difficult to study in a regular school, they hardly learn new material.

### IQ Test Scores - Interpretation of an IQ Score - IQ Scale ...

Ratio IQ Score: IQ Test scores were determined by taking the age at which a person operates and dividing it by their actual age and then multiplying that by 100. For example, if a person can do the work of someone who is 25, but their chronological age is 20, their IQ would be 125 (25/20 X 100 = 125).

### IQ Scores - Test your IQ and Understand your Score

IQ stands for intelligence quotient. Supposedly, it is a score that tells one how "bright" a person is compared to other people. The average IQ is by definition 100; scores above 100 indicate a higher than average IQ and scores below 100 indicate a lower than average IQ. Theoretically, scores can range any amount below or above 100, but in practice they do not meaningfully go much below 50 or above 150.

### IQ Test Scores: The Basics of IQ Score Interpretation

95.5% of IQ scores fall between 70 and 130 99.6% of IQ scores fall between 60 and 140 Low IQ & Mental Retardation An IQ under 70 is considered as "mental retardation" or limited mental ability. 2.27% of the population falls below 70 on IQ tests.

### IQ scale - Iq test for free

An IQ test score is calculated based on a norm group with an average score of 100 and a standard deviation of 15. The standard deviation is a measure of spread, in this case of IQ scores. A standard deviation of 15 means 68% of the norm group has scored between 85 (100 - 15) and 115 (100 + 15).

### IQ Scale explained, what does an IQ Score really mean ...

But scores between 90 and 109 indicate a "normal or average intelligence" or "higher average." While scores between 110 and 119 are indicative of a "superior intelligence" or "above average." Anyone scoring between 120 and 140 in their IQ test would be classified as having a "superior intelligence" or being "gifted."

### IQ Scale: IQ Charts By Age | Science Trends

IQ classification is the practice by IQ test publishers of labeling IQ score ranges with category names such as "superior" or "average".. The current scoring method for all IQ tests is the "deviation IQ". In this method, an IQ score of 100 means that the test-taker's performance on the test is at the median level of performance in the sample of test-takers of about the same age used to norm ...

### IQ classification - Wikipedia

An IQ score up to one standard deviation above 100 is considered normal, or average. Move up one standard deviation and you are in the mildly gifted range. That means that a child with a score of 130 is as different from a child with an IQ of 100 as is the child with an IQ of 70, a score which definitely qualifies a child for special services.

### The Meaning of IQ Test Scores - Verywell Family

IQ scores are placed on a scale where 100 is considered "average" intelligence, and each standard deviation is 15 points above or below that. It is thought that about two-thirds of a given population is within one standard deviation of the mean, or between IQ 85 and IQ 115.
