The sodium-sulfur phase diagram is also presented and used to show the evaporated lakes may leave behind a sodium-rich residue which could supply the torus with sodium. Finally, uncertainties in the model are assessed, including the lack of sulfur emission features in the Loki spectrum, and the alternative possibility that the SO₂ plume ...

Abstract. The distribution of lakes over continents has been addressed by geographers since the eighteenth and nineteenth centuries, and the last great lakes were explored by explorers and scientists in Africa only 100 years ago: Lake Malawi (C. Boccardo, 1616; D. Livingstone, 1850), Lake Tanganyika (R.F. Burton, J.H. Speke, 1858), Lake Victoria (J.H. Speke, 1858), Lake Albert (S. Baker, 1864 ...
