KutaSoftware: Calculus- Evaluating Limits-Direct Evaluation
Finding the Limit of a Power or a Root: When a limit includes a power or a root, we need another property to help us evaluate it. The square of the limit of a function equals the limit of the square of the function; the same goes for higher powers. Likewise, the square root of the limit of a function equals the limit of the square root of the function; the same holds true for higher roots.

Finding Limits: Properties of Limits - Precalculus
Limits and Continuity in Pre-Calculus By Mary Jane Sterling In mathematics, a limit suggests that you're approaching some value. Some functions, such as a rational function with a horizontal asymptote, have a limit as the x values move toward positive or negative infinity — that is, as the value of x gets very small or very large.
