Indeed, at the time there were a grand total of ZERO google returns for "Tektronix 5443" save the ebay listing in question. The photos clearly showed "5443 oscilloscope" printed on the rear panel and the display was a D44, the same display as the rather uncommon 5444. further, the unit was stuffed with 2 5A48 dual trace amps and a 5B40 timebase.

Yes, 1956 for a repair is impossible. The 475 came out around 1974 and the 475A around 1980 or so. The 475 and 475A are nearly identical -- the extra bandwidth comes primarily from tweaking up the output amplifier. So if you need a "hangar queen" for parts, a 475 should work about as well and be more readily available as more of them were made.
