The *Journal of Astronomical History and Heritage* (*JAH²*) is published twice-yearly, in June and December, and features review papers, research papers, short communications, correspondence, IAU reports, and book reviews.

Papers on all aspects of astronomical history are considered, including studies that place the evolution of astronomy in political, economic and cultural contexts. Papers on astronomical heritage may deal with historic telescopes and observatories, conservation projects (including the conversion of historic observatories into museums of astronomy), and historical or industrial archaeological investigations of astronomical sites and buildings. All papers are refereed prior to publication. There are no page charges, and in lieu of reprints authors are sent a pdf or Word camera-ready version of their paper.

A 'Guide for Authors' is on the *JAH²* web site at

www.jcu.edu.au/astronomy/JAH2

and should be followed carefully when preparing manuscripts. Papers and book reviews should be e-mailed to the Editor, Dr Wayne Orchiston (Wayne.Orchiston@jcu.edu.au), or posted to him at

Centre for Astronomy,
James Cook University,
Townsville,
Queensland 4811,
Australia.

Enquiries concerning subscriptions, review copies of books, advertising space, or missing issues of the *Journal* also should be directed to Dr Orchiston.

Annual subscriptions for Volume 8 (2005) are:

AU\$75:00 for institutions
AU\$44:00 for individuals
