

CONTENTS

The First Century of Astronomical Spectroscopy

- Introduction 88
Joseph S. Tenn
- Auguste Comte's Blunder: An Account of the First Century of Stellar Spectroscopy
and How it Took One Hundred Years to Prove that Comte Was Wrong! 90
John Hearnshaw
- Spectroscopy—So What? 105
Matthew Stanley
- From Dilettante to Serious Amateur: William Huggins' Move into the Inner Circle 112
Barbara J. Becker
- The Origin and Diffusion of the H and K Notation 120
Jay M. Pasachoff and Terry-Ann Suer
- The 1910 Solar Conference and Cooperation in Stellar Spectroscopy 127
Richard A. Jarrell
- Extraordinary Claims Require Extraordinary Evidence: C.H. Payne, H.N. Russell
and Standards of Evidence in Early Quantitative Stellar Spectroscopy 139
David H. DeVorkin
- Charlotte Moore Sitterly 145
Vera C. Rubin

Other Papers

- St. Helena, Edmond Halley, the Discovery of Stellar Proper Motion, and the Mystery of Aldebaran 149
John C. Brandt
- The First Astronomical Hypothesis Based on Cinematographical Observations:
Costa Lobo's 1912 Evidence for Polar Flattening of the Moon 159
Vitor Bonifácio, Isabel Malaquias and João Fernandes
