The *Journal of Astronomical History and Heritage* (JAHH) was founded in 1998, and since 2007 has been produced three times yearly, now in March/April, July/August and November/December. It features review papers, research papers, short communications, correspondence, IAU reports and book reviews.

Papers on all aspects of astronomical history are considered, including studies that place the evolution of astronomy in political, economic and cultural contexts. Papers on astronomical heritage may deal with historic telescopes and observatories, conservation projects (including the conversion of historic observatories into museums of astronomy), and historical or industrial archaeological investigations of astronomical sites and buildings. All papers are refereed prior to publication. There are no page charges, and *in lieu* of reprints authors are sent a pdf or Word camera-ready version of their paper so that they can generate their own reprints on demand.

Prospective contributors may download the 'Guide for Authors' directly from the internet by accessing <http://www.narit.or.th/en/files/GuideforAuthors.pdf> or request it from Professor Wayne Orchiston ([wayne.orchiston@narit.or.th](mailto:wayne.orchiston@narit.or.th)). Intending contributors should carefully follow these guidelines when preparing manuscripts. Papers and book reviews should be e-mailed to Professor Orchiston, or posted to him at:

National Astronomical Research Institute of Thailand  
191 Huay Kaew Road  
Suthep District  
Muang  
Chiang Mai 50200  
Thailand

Book reviews should be sent to Dr Clifford Cunningham ([asteriod4276@comcast.net](mailto:asteriod4276@comcast.net))

The JAHH is now an electronic journal. All content back to Vol. 1 (1998) may be downloaded free of charge from either the Journal's web site at <http://www.narit.or.th/en/index.php/jahh> or the SAO/NASA Astrophysics Data System site (<http://bit.ly/1bMwxBr>) and its 11 mirror sites around the world. The electronic version of the journal will continue to be produced three times a year (nominally in April, August and December) and posted on both sites. Those who want a hard copy may print it out or have it done by their local printers. For this reason a single pdf of each entire issue (including the cover) is available on the NARIT site.

## COVER IMAGE

A painting of "The Creation of Trowenna" [the island of Tasmania] by Trawlwoolway artist Lisa Kennedy, who is a descendent of Woretermoteteyer (ca 1797–1847), one of the Aboriginal people who accompanied George Augustus Robinson when he recorded data on Tasmanian Aboriginal astronomical knowledge during the 1830s. This project, and others that aimed to capture details of Tasmanian Aboriginal astronomy, are discussed by Michelle Gantevoort, Duane Hamacher and Savannah Lischick in a paper titled "Reconstructing the star knowledge of Aboriginal Tasmanians" on pages 327–347.
